The 767 package is available at a discounted price of \$69.99 (about 66% off). The 767-300ER is the only 737-400 variant included, it has a 45 airframe. The special cabin boasts a full set of LED ambient lighting. The special set of external lighting can be turned on or off to mimic each phase of cabin lights in commercial airlines. There are three levels of power in the 767 Captain 767 package. First, there is the base 767 model which features two GTF-768-10 turbofans located at the inboard and outboard mid fuselage for low-speed flight. The passenger cabin uses the same flight deck as the 744, 757 and 777. Then there is the 767 Captain 3D with a -10 turbofan and it has the same flight deck as the 744 (it also features Stabilator on the aircraft). A third version of the 767 Captain uses the -10 turbofan but has a -9 and -8 flight deck. Flight Simulator version 3.1 required for the 767 Captain.
